Summary

At Sourcefit, my focus has been on developing WordPress projects, leveraging my command of Figma and CSS Flexbox to produce custom templates and plugins that elevate website functionality. Our collaborative efforts have resulted in increased user engagement and the delivery of high-quality projects that resonate with our audience.

Previously, as a Full Stack Developer at Webeffect, I honed these competencies, developing complex WordPress and Gatsby web applications while enhancing user experience. My dedication to innovation and collaboration ensures that every solution I deliver is not only effective but also advances the digital presence of the organizations I work with.

furniture manufacturer, built on WordPress. The site features a user-friendly design that highlights their products and services. **(Note: The website is currently closed.)**

EDUCATION

Fes House, Yerevan – College
October 2004 – October 2005

At Fes House College, I engaged in a rigorous curriculum designed to provide a solid foundation in web development and design. Throughout the program, I learned essential programming languages, including:

HTML: Gained proficiency in structuring web content.

CSS and SCSS: Developed skills in styling and layout design for enhanced user experiences.

JavaScript: Acquired knowledge of client-side scripting for interactive web applications.

PHP and MySQL: Learned server-side programming and database management for dynamic website functionality.

Ghazaros Aghayan, Yerevan – High School
September 1991 – October 2001
